## **BID PACKAGE SPECIFICATIONS**

### **BACKGROUND AND PROJECT SCOPE**

The City of Providence is seeking proposals for architectural design services to renovate the pool facility at the Davey Lopes Recreation Center. Currently, the pool's plumbing systems are well past their life and not serving the needs of the facility. Additionally, the City currently lacks an indoor pool at its recreation facilities open to the public for year-round swimming activities.

The pool at Davey Lopes is currently connected to what is now an indoor boxing gym. Originally, the gym facility and the pool were intended to be used together but over time the usage has split. The City desires to maintain use of the boxing gym facility as a boxing gym, but with the pool equipment and drainage removed.

The goal of this project will be to transform the current run-down outdoor pool which leaks so significantly as to require constant repairs, into a remodeled indoor pool with new equipment, new plumbing, and an enclosure suitable for use in all weather conditions. The area to be enclosed covers approximately 14,000 square feet. The enclosure will need sufficient MEP and HVAC equipment to allow for the pool to be used throughout the winter months.

In parallel with the work to renovate the pool, the City also desires to resolve several longstanding issues with the recreation center itself. Needed renovations for the recreation center itself include: new tile floors in the bathrooms, shower plumbing repairs, repairs to the roof of both the recreation center itself and the boxing gym to stop leaks, aesthetic improvements to the front entrance, and new windows in several rooms.

Through Conceptual Design, the City will evaluate concepts ranging between the indoor pool and existing building improvements against the established Project Budget, and will determine a path forward for the full Design scope. The final project scope may be fully focused on the Indoor Pool, fully focused on improvements to the existing building, or it may be a mix of both depending on budget utilization among other factors.

In summary, key aspects of the design of this project may include:

- A new enclosure for the current outdoor pool to convert it to an indoor pool which can be used year-round, including all required HVAC, MEP, and Fire Protection equipment.
- Total replacement of the pool's water supply, filtration, and drainage systems.
- Removal of pool drainage systems from the boxing gym.
- Renovations to the existing recreation center building including:
  - Repairing leaks in the roof
  - Replacing the existing bathroom floors with new tile
  - Repairs to existing shower plumbing
  - Exterior front entrance aesthetic improvements
  - New windows in community rooms, snack room, and director's office
  - Updated finishes including painting and wall coverings, with some components offering coordination possibilities with the Providence Art, Culture, and Tourism Department.
  - HVAC improvements throughout the building, including the gym.
- Renovations to the boxing gym, including:
  - Installing a new HVAC system in the boxing gym to provide efficient heat during the winter and cooling in the summer.
  - Repairing leaks in the roof.

The City currently has a budget of \$6,120,000.00 for this work. Designs must be based on completion of construction by Q3 of 2026. Suggested phasing of construction of the different elements will be a critical part of the design process.
